"We know how many great strata managers and strata industry professionals are out there, working hard for their committees and delivering brilliant outcomes to the strata communities they manage year after year.

"But what we also know is that there are some strata professionals falling short of that mark, which is why we formulated our six-step plan for reinforce confidence in the industry.

"We've been incredibly busy over the past three or so months implementing our plan and have made significant progress, or fulfilled each of the six steps.

“Our hope is that consumers can gain confidence by seeing that SCA members are held to a higher standards through an enforceable Code of Conduct with an independent Chair, through levels of disclosure and transparency that go beyond state and territory legislation and by taking advantage of SCA advice, training and best practice resources.

“We want to see our actions lifting standards throughout the industry, not just to the SCA members that these steps apply to,” Ms Fisher said.
